4x6 folded recipe card - perfect for longer recipes!

Print onto cardstock or heavy paper. Cut out both cards together, around the outside of the black border design. **DO NOT CUT THE WHITE LINE BETWEEN THE CARDS.**

You want the cards to remain attached to each other. Fold the second card back, along the white line, so the top card is seen in your recipe box. You can unfold it, showing the entire recipe, when it is time to cook!

If you want a printable single card for recipes, check out my single 4x6 cards!
